HISTORY OF THE DENVER & RIO GRANDE WESTERN RAILROAD

The Denver & Rio Grande Railway, brainchild of Civil War veteran General William Jackson Palmer, was incorporated by Palmer and his associates on Oct. 12, 1870. Palmer intended to provide a north-south link between the major transcontinental railroads that passed north and south of Colorado. The first trip on the line occurred Oct. 26, 1871, and took passengers (primarily local newspapermen) from Denver to Colorado Springs. While the original plan was to build south to El Paso, Texas, circumstances soon turned the line westward. The Denver & Rio Grande never reached farther south than northern New Mexico.

As the D&RG Railway expanded westward, it ran into conflicts with other railroads that also wanted to build in the lucrative mining regions of the Rocky Mountains. The Atchison, Topeka & Santa Fe Railroad was particularly aggressive in this area. A quarrel over the right-of-way through the Royal Gorge escalated into a "war" in 1878 and was not settled by the courts (in favor of the D&RG) until 1880.

In the summer of 1881, in order to facilitate the D&RG's westward push, Palmer incorporated a new railway in Salt Lake City – the Denver & Rio Grande Western Railway. The two lines met near Green River, Utah in 1883. Around the same time, the D&RG Railway leased the tracks of the D&RGW Railway for thirty years. The lease, in conjunction with Palmer's constant program of expansion (he feared other lines moving into D&RG territory), put the D&RG in a difficult financial situation. By the summer of 1883 the Board of Directors wanted Palmer out, and they asked for his resignation. He consented, but remained not only as president of the D&RGW Railway, but as a Director of the D&RG. He resigned his position as Director in June 1884 in the midst of a dispute between the two lines over the terms of the D&RG's lease of the D&RGW tracks.

By July 1884, the D&RG's financial condition was so poor it went into receivership. The court appointed William S. Jackson as receiver. Not long after Jackson took control of the D&RG, the D&RGW also found itself in receivership, with W.H. Bancroft as its receiver. Jackson's management of the Denver company could not forestall the D&RG's sale at foreclosure in 1886. British and American stockholders purchased the troubled line, incorporated it as the D&RG Railroad, and named Jackson as president. The courts released the D&RGW from its receivership in August of 1886, and Palmer resumed control of his railroad.

David H. Moffat, an important figure in the development of Colorado railroading, succeeded Jackson as D&RG president in 1887. He remained in that position until 1891, when he resigned in anger over criticism of his management of the line. During his term of office, the D&RG began to convert its main line tracks from narrow gauge to standard gauge. The D&RG also joined with the Colorado Midland to incorporate the Rio Grande Junction Railway for the purpose of building a line between Rifle and Grand Junction. After Moffat resigned, the Board appointed Edward T. Jeffery to head the company. He was immediately under pressure to make the D&RG profitable, and enable it to meet the interest payments on its bonds. Jeffery met the challenge, and by 1893 the road was in

excellent financial condition. Thanks to his conservative policies the D&RG weathered the financial panic of 1893 relatively well.

In 1901 the D&RG purchased a controlling interest in the Rio Grande Western Railway (formerly the D&RGW, it reincorporated in 1889). In that same year General Palmer retired from the RGW, and George Gould (son of Jay) became Chairman of the Board of the D&RG. Competition from the Union Pacific in Utah (the UP tried to deny the D&RG any traffic) forced Gould to make plans to expand his line westward from Ogden, Utah.

To this end Gould and his associates incorporated the Western Pacific Railway in California in 1903, with E.T. Jeffery as its president. The birth of the WP marked the beginning of very difficult times for the D&RG. Three contracts between the D&RG/RGW and the WP obligated the D&RG system to bear the cost of constructing the WP (in the form of bonds), guarantee the semi-annual interest on 30-year 5% gold bonds, and to honor a traffic agreement. In addition, the RGW was to pay any construction cost overruns.

The burden placed upon the D&RG by the contracts with the WP was almost unbearable. By 1913 the Boards of Directors of the D&RG, WP and Missouri Pacific (many of the members served on more than one of the boards) began to discuss the D&RG's plight. The discussions and the continuing financial difficulties of the D&RG led to court battles with the Equitable Trust Co. (which brought suit against the D&RG for non-payment of debts) and a reorganization plan for the WP. In July 1916 the WP Railway was sold to stockholders and reorganized as the Western Pacific Railroad Company.

The D&RG lost the case with the Equitable Trust Co. in August of 1917. The court determined the railroad owed Equitable \$38 million. The D&RG did not have that much money on hand, but did have some assets in the form of cash, stocks, and bonds. The Equitable Co. sued in New York and Chicago courts to obtain some payment on the \$38 million owed to it, and in 1918 was awarded over \$6.5 million of the D&RG's assets. Another \$4 million was handed to the Equitable Co. when the shares of the Utah Fuel Co., a D&RG subsidiary, were sold at a public auction and the proceeds applied toward the judgment against the D&RG.

This strangulation of the railroad left it with only one option – yet another receivership. To forestall the Equitable Co. from asking for a receivership on terms favorable to it, the D&RG turned to a minor creditor, the Elliot Frog & Switch Co., and asked it to initiate receivership proceedings. Equitable's lawyers tried to stop this in court, but were denied.

In January 1918 the court appointed Edward L. Brown and Alexander R. Baldwin (a vice-president of the WP) as co-receivers. World War I, which the U.S. entered in 1917, complicated the receivership and Equitable's continuing efforts to collect on the judgment awarded to it. All railroads in the country were under the control of the U.S. Railroad Administration, headed by Director General William G. McAdoo, from 1917 to 1920. McAdoo temporarily blocked the Equitable's efforts, but in May of 1918 Judge Sanborn ruled that the D&RG must pay \$3.6 million of its debts. The money came from the sale of

Securities, cash in the bank, and \$1.5 million contributed by the government for its use of the railroad. When the Railroad Administration ended its control of the country's railroads in the spring of 1920, the D&RG was still in receivership.

The receivership did not improve the financial condition of the D&RG, and by the fall of 1920 the company's creditors once again forced it onto the auction block. On Nov. 20, 1920 the D&RG was sold for \$5 million, and on Nov. 30 the new owners incorporated the Denver & Rio Grande Western Railroad. Angry stockholders of the old company, who received nothing from the new D&RGW, held up the court's confirmation of the sale for several months, but on Mar. 28, 1921 the court confirmed the sale. Serious financial problems, some caused by the devastating Pueblo flood in June of 1921, continued to plague the D&RGW, and by the summer of 1922, the Banker's Trust Co. of New York and the New York Trust Co. instituted new foreclosure proceedings, based on the D&RGW's failure to meet the interest payments on its bonds.

Federal judges Robert E. Lewis and J. Foster Symes named Joseph H. Young, president of the D&RGW, as receiver in July 1922 over the protests of the New York and Banker's Trust companies, In addition, Judge Lewis further frustrated the bondholders by ordering Young to improve the condition of the D&RGW:

It is common knowledge that the road is badly out of repair. When the case came into this court before, at the time of the forming of the Denver & Rio Grande Western Railroad out of the old Denver company, the railroad conditions were promising. The Western Pacific company took the road over, but they have done little with it. The present owners have not seen fit to keep it in condition, and when it comes into this court we shall see that it is put in condition and we shall see that done before it is turned back to the owners. Furthermore, it will be the policy of this court that no interest shall be paid on the bonds of the road until it is completely rehabilitated and the public thus safeguarded.¹

As ordered by the Judge, receiver Young spent millions on upgrading the D&RGW, particularly the rails and rolling stock.

Even with the court-ordered improvements proceeding, the future of the D&RGW looked uncertain. In 1923 – 1924, the Missouri Pacific and the Western Pacific tried to absorb the smaller line, but these efforts drew protests from those bondholders who feared they would be wiped out as had the stockholders of the D&RG in 1920. In Dec. 1923, the Interstate Commerce Commission approved a reorganization plan for the D&RGW, and in Oct. 1924 the D&RGW was sold to the reorganization managers – Kuhn, Loeb & Co. and Equitable Trust Co. The new D&RGW president was J.S. Pyeatt.

¹ *Rocky Mountain News*, July 22, 1922

Over the next ten years the two major events for the D&RGW were the construction of the Moffat Tunnel in 1927 and the completion of the Dotsero Cut-off in 1934. The Moffat Tunnel, running under James Peak in northwestern Colorado, was named for the man whose dream it was – David H. Moffat. Moffat spent many years and a considerable portion of his personal fortune on the tunnel dream, but to no avail. Over a decade of failed efforts by Colorado business and political leaders to get construction financed and started followed Moffat's death in 1911. Construction actually began in 1923 and was completed in 1927. Like the Moffat Tunnel, the completion of the Dotsero Cut-off in 1934 came only after years of legal battles and financial problems. Despite the opening of the cut-off the D&RGW's financial woes worsened, due in no small part to the Depression. Thus in 1935 the D&RGW was once again in court, petitioning for reorganization under the Federal Bankruptcy Act. The U.S. District Court appointed Wilson McCarthy and Henry Swan as co-trustees. The two men, with the approval of Judge Symes, formulated a multi-million dollar improvement plan. In 1937 alone the two men spent \$18 million on the company. By the end of 1939 the railroad's fortunes had turned around to a remarkable degree. The D&RGW's revenues continued to climb in the 1940s, particularly after the U.S. entered World War II in Dec. 1941.

In April 1947 the trusteeship of Swan and McCarthy ended and the D&RGW returned to private ownership under an ICC-approved reorganization plan. The plan was opposed, unsuccessfully, by the Missouri Pacific and the Western Pacific all the way to the U.S. Supreme Court. The reorganization committee, headed by John Evans, elected a new Board of Directors with Evans as its chairman. The Board selected Wilson McCarthy as the president of the D&RGW.

In the post-war years passenger traffic declined on the line but freight traffic grew, thanks in part to McCarthy's policy of encouraging industrial and agricultural development in Rio Grande territory. McCarthy provided strong leadership of the D&RGW until his death in 1956. Gale B. "Gus" Aydelott succeeded him in the presidency, and continued many of McCarthy's forward-looking policies, especially that of improving the line. While Aydelott's improvement program included attempts to reduce or eliminate passenger service on unprofitable runs, it also included technical advances in communications, locomotives and other areas.²

In 1969 the D&RGW formed Rio Grande Industries, Inc., a holding company designed to diversify and expand the company into other fields. In 1970 the various activities of RGI included real estate development, industrial contracting and insurance, but the railroad continued to produce the majority of RGI's annual income, most of it from freight revenues. The 1960s and 1970s saw a steady downward trend in passenger traffic on all railroads. By 1970 the D&RGW had virtually abandoned passenger traffic, with the exception of a thrice-weekly run from Denver to Salt Lake on the *Rio Grande Zephyr*, formerly the *California Zephyr*. Competition from the airlines and the rapid growth in the number of private cars

² This historical outline of the D&RGW was chiefly drawn from Robert G. Athearn's *Rebel of the Rockies: The Denver and Rio Grande Western Railroad*. (Yale University Press, 1962)

resulted in many passenger trains operating at a loss. The D&RGW retired the *Rio Grande Zephyr* in April 1983, and Amtrak took over the running of passenger trains over the Rio Grande route.³

By the time W. J. "Bill" Holtman succeeded Aydelott as President of the D&RGW in 1977 (and as CEO in 1978) Aydelott had built up the railroad's annual freight revenue to over \$305 million, and won the admiration and respect of railroad men nationwide for the "tight ship" he ran. Aydelott retired as chairman of the railroad in 1983, and died in 1991.⁴

Between 1984 and 1987 Denver businessman Philip F. Anschutz purchased enough of the D&RGW stock to become a majority owner, and the formerly publicly-held company went private. In 1988 Anschutz purchased nearly a third of the stock of the Southern Pacific railroad and merged the two lines to form the Southern Pacific Rail Corp. In 1995 Anschutz and Union Pacific officials agreed to a deal that would merge the two lines and restore the UP to its former status as North America's largest rail company. Despite a great deal of opposition from various interest groups, including farmers and ranchers who feared decreases in service and increases in freight rates, the deal was approved by the Surface Transportation Board on July 3, 1996.⁵

SCOPE AND CONTENTS

The Denver & Rio Grande Photography Collection includes several different types of photographic materials, including photoprints of many kinds, photograph albums, glass and film photonegatives, lantern slides, stereographs, color phototransparencies and slides, and photomechanical prints. The Colorado Division of State Archives inventoried this material and transferred it into the Society's care in 1964. In the following years, Society staff filed the Denver & Rio Grande photoprints, stereographs, and many slides in the Society general photo subject file.

In 1995 and 1996, project staff funded by the National Historical Publications and Records Commission restored all materials from the original Denver & Rio Grande photography collection to their original, integrated archive. Project archivists Janet M. Wendt and Colleen P. Bradley, with volunteer assistants, retrieved photographs from the general subject file and from other storage locations; the collection material then was consolidated, sorted by media type, and identified with descriptive and subject headings.

Project staff arranged the photoprints in alphabetical order according to standard Library of Congress subject headings, then grouped them into archival envelopes and placed the envelopes in twenty-eight (28) numbered boxes for long-term storage. Fifteen (15) Hollinger boxes (designated by letter) and one flat file drawer provided storage for oversized prints.

The Denver & Rio Grande Railroad assigned numbers to the glass and film negatives in its corporate archive long before it was transferred to the Society. Project archivists retained this original numbering system for all negatives, and assigned subject headings for enhanced access; volunteers created a computerized inventory of the negatives that can be word-searched for subject information.

No comparable numbering system existed for lantern slides or most phototransparencies, or for some 4x5 and 8x10 inch film negatives. After sorting, preliminary arrangement, and research by archivists, volunteers, and railroad experts, these materials received new identification numbers and Library of Congress subject headings. Archival storage then was provided as follows: baked enamel file drawer with acid-free lining for lantern slides; high-density polypropylene and acid-free paper sleeves for boxed transparencies; acid-free envelopes and boxes for film negatives. About fifty (50) cellulose nitrate film negatives were removed to cold storage; staff placed markers in the negative files to preserve the filing sequence and to cross-reference the isolated materials. Volunteers inventoried all of these materials to promote research access to the collection.

Thirty-five millimeter and stereo phototransparencies from the 1950s and 1960s presented difficult identification problems. A general inventory was created to reflect the overall content of this group of materials, although the vagueness of their subjects prevented the use of precise Library of Congress subject terms. Project archivists repackaged the material in one archival box.

Twenty-five stereographs from the Society's stereograph collection bore Denver & Rio Grande collection markings. Because these items already had been individually catalogued in the Society's Argus database, staff simply produced photocopies of the stereographs, annotated the copies to indicate the storage location of the original photoprints, interfiled the copies in the Denver & Rio Grande research archive, and returned the original photoprints to their appropriate storage locations.

Photograph albums fell into two groups. One group consisted of 62 albums documenting the railroad's assets by sections or administrative districts, and were sequenced to follow the railroad's operations from Denver westward. The Society preserved the original sequence, numbers, and titles of all albums in this group. Staff observed that, for the most part, the photoprints contained in these albums corresponded to the 4x5 inch film negatives in the Denver & Rio Grande archive.

The second group of albums consisted of 44 albums, including mass-produced booklets of photomechanical illustrations, compilations of photographs of varied subjects and commercial albums by particular photographers. Project staff preserved a numbering system applied to these albums by the Colorado State Division of Archives in 1964, and extended the numbering sequence to include albums that had not been numbered earlier.

A group of photoprints by O. T. Davis, once commingled with the Society's photography subject file, was assembled in 1983 and 1984 for exhibition research and managed as a separate collection for roughly ten years. Project archivists identified many Denver & Rio Grande collection photoprints in the O. T. Davis collection, and restored them to the railroad archive with appropriate subject headings. However, in response to patron demand for O.T. Davis photographs, the archivists stored the O.T. Davis material in separate boxes to facilitate access.

Project staff also located Denver & Rio Grande collection photographs in the already-cataloged Original Print file of rare or fragile vintage photoprints. Annotated copies of these photographs were filed in the appropriate subject envelopes of the railroad archive, while the vintage prints remained in the Original Print file for safekeeping.

Following is a summary list of the contents of the Denver & Rio Grande Railroad Photography Collection:

1.	Prints, including oversize prints: 19 regular boxes, Boxes 1 to 19; 11 oversize boxes, Boxes 1 to 5 & Boxes A to F; 1 drawer, Drawer No. 1
2.	Glass negatives, kept in file cabinet drawers
3.	4x5 film negatives; kept in file cabinet drawers
4.	Transparencies: Boxes 21
5.	Small miscellaneous negatives: Box 23 & 24
6.	8x10 film negatives: Box 22
7.	Lantern slides: Lantern Slides Cabinet Drawers A2.B5. (#159-
8.	Slides: Box 28
9.	35mm Stereotransparencies: Box 8
10.	Miscellaneous Albums: Boxes 25 – 28
11.	Loose Albums: Aisle 4
12.	Albums on the wall: Aisle 4
13.	O.T. Davis photographs, including oversize prints: Box 20, Boxes A, B, C, D
14.	Miscellaneous enclosures: Box 25
15.	Stereographs in Stereograph Drawer
